Luxxur® herbicide on farm inventory

Dear Valued Grower,

It has come to our attention during recent routine testing of samples of Luxxur herbicide inventory, that the active ingredient in Luxxur B (thiencarbazone-methyl) no longer met the required specifications. This is due to the length of time since the formulation of Luxxur inventory.

If you have on farm inventory of Luxxur herbicide, please return it to your retail of purchase.

The Crop Science Division of Bayer is dedicated to providing high quality products to farmers and retailers across western Canada. We appreciate your cooperation and continued support.

If you have any questions please contact your local Bayer representative or call 1-888-283-6847.

Kind Regards,

A handwritten signature in black ink, appearing to read "Mark Alberts".
