

# 2019 Prosaro XTR Yield Guarantee Program

Powered by FieldView

Prosaro® XTR fungicide provides fusarium head blight protection and late season disease control that led to yield increases that were higher than the tested competition.<sup>1,2</sup> Bayer grower-co-operator demonstration strip trials in 2018 showed that applying Prosaro XTR at head timing provided a yield increase of 3.1 bu/ac. over untreated wheat<sup>1</sup> and 6.2 bu/ac. over untreated barley.<sup>2</sup>

1 Source: Wheat - 7 Bayer grower-cooperated, replicated DSTs (2018). Your results may vary according to agronomic, environmental and pest pressure variables.

2 Source: Barley - 3 Bayer grower-cooperated, replicated DSTs (2018). Your results may vary according to agronomic, environmental and pest pressure variables

## The Guarantee

- **Bayer will rebate a maximum of 160 acres of purchased Prosaro XTR if it doesn't out-yield Caramba® fungicide on qualify acres on your farm.**
- "out-yield" is defined as a demonstrated yield difference at or above 0.1 bushels per acre (bu/ac).
- Rebate will be made based on the 2019 Suggested Retail Price of Prosaro XTR:
  - \$433.00\* per 6.5L jug where one jug treats 20 acres at a rate of 324 mL/acre;
  - \$3,464\* per 160 acres of Prosaro XTR.
- Eligible crops are wheat and barley.
- Participants must be signed up with Climate FieldView™ and the BayerValue™ Rewards program to participate.
- Participation is limited to a maximum of 300 qualifying growers selected in Bayer's sole discretion.
- Further terms and conditions are outlined below.

\*Subject to change in Bayer's sole discretion.

## Participation

1. Contact your local Bayer Territory Sales Representative to inquire about potential participation.
2. Your participation must be confirmed by a Bayer Territory Sales Representative or your local retail in order to be eligible.
3. Participants and comparison land must be in the provinces of Alberta, British Columbia, Manitoba or Saskatchewan
4. A Prosaro XTR Yield Guarantee Program contract will be provided and must be signed confirming your participation.
5. Climate FieldView will be used to capture and analyze results. To participate you must be signed up with and use Climate FieldView. If you are not already using Climate FieldView contact your Bayer Territory Sales Manager for assistance.

## The Comparison

The follow further terms and conditions apply to the in-field comparison.

### Product Use Rates:

- Product use rates must follow label instructions where Prosaro XTR must be applied at a rate of 324 mL/ac. (20 ac. per 6.5L jug) and Caramba® fungicide must be applied at a rate of 405 mL/ac. (20 ac. per 8.1L jug).

### Comparison Areas:

- Comparison treatments must be made side by side, in the same field.
- The minimum size of each treatment must be three full 30 foot swathes of 500 feet in length or three straight-cut combine passes of 30 feet in width and 500 feet in length.

- The area harvested must be the same size for both treatments (e.g. five full 30 foot swathes of 500 feet in length or five straight-cut combine passes of 30 feet in width and 500 feet in length).
- If straight-cut combining, the harvest passes must all be made in the same direction for both treatments (e.g. north for all passes) to minimize the effect of possible lodging, etc.
- Comparison treatment areas and agronomic practices must be substantially equal and variations are substantially eliminated such that the only meaningful variable is the fungicides applied.

#### Equipment and Monitors:

- Seeding, herbicide, fungicide and harvest maps must be recorded using Climate FieldView Drive.
- Harvest of each treatment must be done with the same combine that is yield monitor enabled.
- In the event of any differences between this document and the program contract, the program contract will prevail.

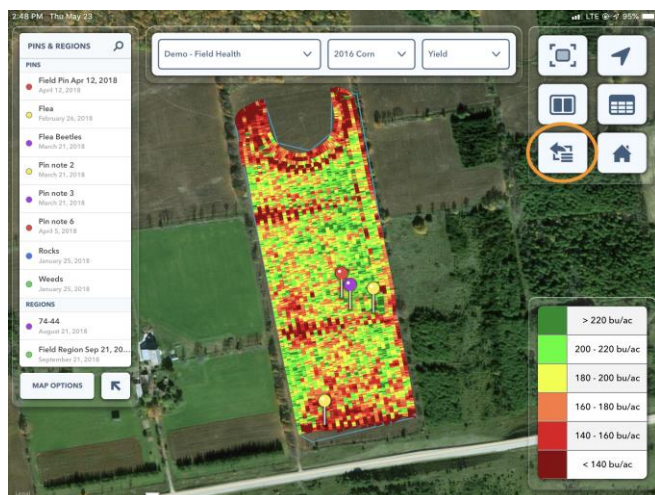

**Bayer, in its sole discretion, reserves the right to reject any comparison they deem unfair for any reason.**

## Data Analysis

- Data analysis will be done using Climate FieldView data shared with Bayer and all data will be managed in accordance with the Bayer privacy policy and applicable Canadian privacy legislation and used by Bayer to administer this Program.
- By participating in the Program the participant consents to all terms and conditions associated with the BayerValue Grower Program. Full terms and conditions can be found at [cropscience.bayer.ca/BayerValue](https://cropscience.bayer.ca/BayerValue)

- By participating in the Program the participant also consents to all legal, privacy and terms and conditions associated with using Climate FieldView. More information can be found at [climatefieldview.ca/legal/disclaimer](http://climatefieldview.ca/legal/disclaimer).
- Climate FieldView data for this comparison must be shared with Bayer using the “share” function associated with the account [ProsaroYieldGuarantee@Bayer.com](mailto:ProsaroYieldGuarantee@Bayer.com)
- Details on how to use the share function are below and can be found at <https://support.climatefieldview.ca>
  - When harvest is complete send your data files from the FieldView Cab App to [ProsaroYieldGuarantee@Bayer.com](mailto:ProsaroYieldGuarantee@Bayer.com)
  - From the Map Screen select the bottom left button (with the arrow pointing out)

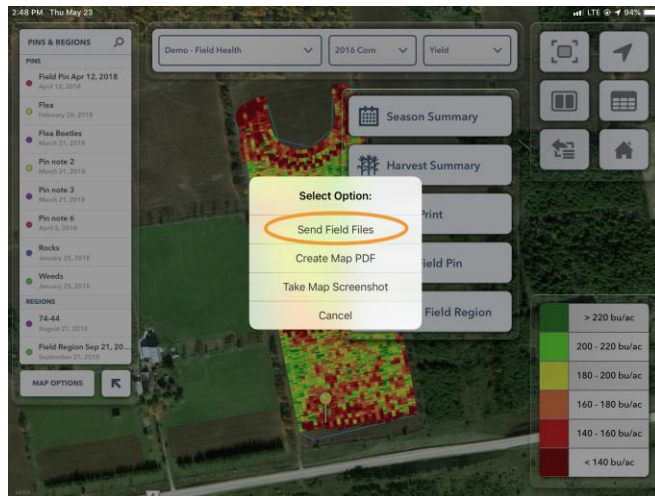

- Select 'Send/Print' button

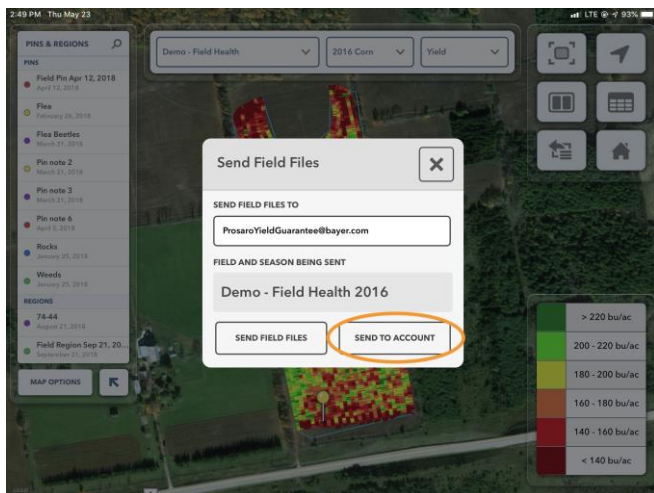

- Select 'Send Field Files'

- Enter the following email address: [ProsaroYieldGuarantee@Bayer.com](mailto:ProsaroYieldGuarantee@Bayer.com)
- Select 'Send to Account'

## Program Reconciliation

- If a payment is required it will be made as part of the BayerValue™ Rewards Program endeavored to be provided by the end of April 2020.
- Participating growers who recognize a potential payout scenario at harvest **MUST** contact their Bayer Territory Sales Rep to insure their Climate FieldView data takes priority for analysis.
- If required, payment will be made on Prosaro XTR purchases up to a maximum of 160 ac. where one 6.5L jug equivalent treats 20 ac. (324 mL/ac.).
- The total rebated amount cannot exceed the total purchase amount (i.e. if the maximum amount of Prosaro XTR purchased is 1 jug, no more than 1 jug will be rebated).

## Example Scenarios

Example	Payment
<b>160 ac. of Prosaro XTR Purchased</b> Caramba® fungicide yield = 48 bu/ac. Prosaro XTR yield = 48.1 bu/ac.	\$0 (Prosaro XTR out-yielded Caramba® fungicide)
<b>200 ac. of Prosaro XTR Purchased</b> Caramba® fungicide yield = 48 bu/ac. Prosaro XTR yield = 47.9 bu/ac.	160 ac. of Prosaro XTR at SRP = \$3,464 (max eligible payment)
<b>120 ac. of Prosaro XTR Purchased</b> Caramba® fungicide yield = 48 bu/ac. Prosaro XTR yield = 47.9 bu/ac.	120 ac. of Prosaro XTR at SRP = \$2,598 (payment limited to 120 acres purchased)
