

ONE TRUSTED NAME. MAXIMIZING YIELD ACROSS YOUR KEY CROPS.

STRATEGO[®] PRO

Stratego[®] PRO fungicide is the one fungicide that helps improve the quality and yield of your soybeans, corn, spring cereals and winter wheat.

THE PRODUCT

Stratego PRO – the fungicide you trust to protect your winter wheat and soybeans is also registered on spring cereals and corn. It delivers yield gains and protects your crops with cost-effective control of key diseases such as white mould, powdery mildew, septoria and Northern corn leaf blight.

ACTIVE INGREDIENT	PACKAGE SIZE
Prothioconazole – Group 3 Trifloxystrobin – Group 11	Available in 7.1 L jugs or 113.6 L totes – Corn & Soybeans: each 7.1 L jug treats 30 ac. – Wheat: each 7.1 L jug treats 40 ac.

CROP	DISEASE	RATE	TIMING	WATER VOLUME	RAINFEST
Corn (field, seed, sweet)	Common rust, eye spot, grey leaf spot, Northern corn leaf blight, Southern corn rust		Apply between 7-leaf and early tassel, or at the onset of disease presence		
Soybeans	Asian soybean rust, brown spot, charcoal rot*, frog-eye leaf spot, phomopsis stem blight, white mould*	572 mL/ha (230 mL/ac.)	R1 (beginning of bloom) to R5 (beginning of seed formation). For best results, apply between R2 (full bloom) and R3 (onset of pod formation).	5-20 gal./ac.	In 1 hour
Wheat (spring, winter)	Leaf rust, powdery mildew, septoria leaf blotch, stem rust, stripe rust, tan spot	440 mL/ha (177 mL/ac.)	Optimal timing is T1 (Z 21 to Z 37). This application can be made in conjunction with herbicide timing for early-season pest control.		

Note: Refer to label for complete list of registered crops and labelled diseases

ONE TRUSTED NAME. MAXIMIZING YIELD ACROSS YOUR KEY CROPS.

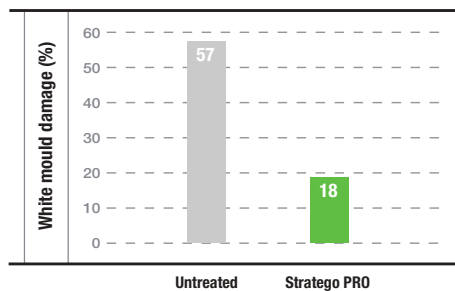

STRATEGO[®] PRO

SOYBEANS

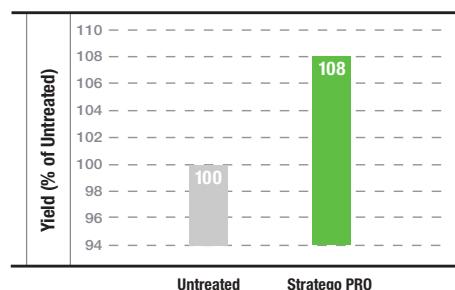

- **Features and benefits:**
 - o Delivers an 8% yield increase over untreated
 - o Superior suppression of white mould with one pass
 - When disease pressure is high, make a second application 10-14 days later
 - o Provides outstanding value vs. competitive products
- **Application tips:**
 - o For best white mould protection, aim to protect flowers and apply before disease is present

STRATEGO PRO DELIVERS WHITE MOULD SUPPRESSION WITH ONLY ONE PASS

Application was made when soybeans lowest to the ground were roughly 1/2" long

IMPROVING YIELD IN SOYBEANS

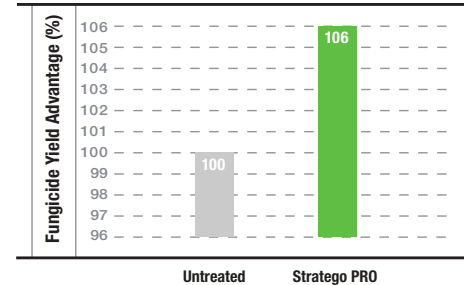

Across 17 trials (2012-2013)

CORN

- **Features and benefits:**
 - o Delivers a 6% yield increase over untreated
 - o Delivers early control against key leaf diseases, including Northern corn leaf blight
- **Application tips:**
 - o Can be applied by ground or aerial application

STRATEGO PRO EFFECT ON CORN YIELD vs. UNTREATED

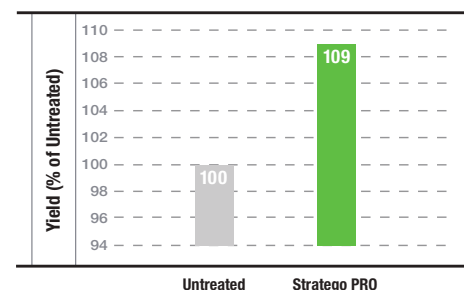

Across 24 trials (2013-2015)

WHEAT

- **Features and benefits:**
 - o Delivers a 9% yield increase over untreated
 - o Superior control of powdery mildew and septoria
- **Application tips:**
 - o Tank mix with Buctril[®] M or Infinity[®] herbicides for complete early-season pest management
 - o When tank mixing with Buctril M or Infinity, do not apply within 24 hours of night temperatures below 5°C as crop injury (leaf tip burn) may occur
 - o For best results, apply before disease is present or at the first sign of disease pressure
 - o Complete a follow-up application with Prosaro[®] fungicide at heading for complete disease management

IMPROVING YIELD IN WINTER WHEAT

Across 26 trials (2012-2014)
